## SUBJECT

AREA: GROUND FORCES

## IEG PI NOTICE

## DISTRIBUTION:

ALL PI's

No. 35-76

## TITLE/SIGNIFICANCE:

NEW SOVIET PROBABLE LARGE - CALIBER  
SELF-PROPELLED GUN

COMMENT: The new Soviet probable large-caliber self-propelled gun has been observed in a static display at Moscow Central Airfield and at the Leningrad Tank Testing Area. This piece of equipment consists of a gun tube in length mounted the rear of a chassis which is somewhat similar to the US M107 175MM gun, in that both vehicles have long gun tubes mounted on the rear of the chassis with no superstructure or turret.
